Dear Sir: -My attention has been called to an article in your JOURNAL of January 26th with regard to the "insanitary condition" of the house of a patient of mine were there were six cases of typhoid fever, &c. :
"The cause there was the general insanitary condition of the house, caused mainly by the location and condition of the water closet, which was near the dwelling. In addition to this, the pipe which voided the discharges from the kitchen was in close proximity to the water-closet, and both near the air pipe which supplies fresh air to the furnaces in the cellar. In the belief that this air pipe drew into it the deleterious air from both the water-closet and the offel from the kitchen (the latter of which laid the offal from the kitcheu, (the latter of which laid upon the top of the ground and was of a fould character) a scientific test was made by order of Dr. Steuart. He went near the mouth of the air duct alluded to and lit some rags, upon going immediately in the cellar he readily detected the odor from the burning rage, which was pretty plain proof that the air duct had been conducting into the cellar and then through the house the unwholesome eilluvia from both places, and this fact is believed to account for the crigination of the disease."
Please allow me to make the following statement In my opinion no satisfactory cause has, as yet, been found for the fever. The charge of general insanitary condition will not hold. First, the water-

closet in the house had been put in first-class order by Rothrock, of Baltimore, last summer; City Inapector put one pound of-oil of pepperment into
the cesspool and waited for one hour; no smell
entered the house. The closet pipe is not near the
kitchen drain, which opens 35 feet away down the
hill from the kitchen, and there never was any feetid offal on the top of the ground. Both closet pipe and kitchen drain are at least 50 feet from the turnace air pipe; besides, a two-story building comes between. So it is utterly impossible for the ir pipe to draw deleterious air from these sources The experiment of burning rags, as mentioned proves nothing, as it is just what would occur in every house having a cold-air furnace pipe com-municating with the out-ide air. When the neigh-John's Mission. York Turnpike, at 3½ o'clock. All | bors burn brush and the wind is in the right direction the odor comes into my furnace air pipe.
Fighty feet behind the dwelling house, covered by a wood shed, are two small privies; these were full and the Inspector recommended that they should be emptied. This was done by men sent out from the city. They were not able to use a pump, as the contents were nearly solld from the amount of dry earth and air slacked lime which had been used daily in them. The water is pumped by horse power from a well which is about one hundred yards from the house. Prof. Tonry has analyzed it and pronounced it

much in requesting you to insert the above, and Yours, very truly, T. CHALMERS PERBLES, M. Prof. Tonry analyzed the water used for drinking and cooking purposes. He certified that it was pure and wholesome. The water closets during the pastfull had been carefully overhauled at much expense. An expert from the City Health Department recently subjected them and the fixtures connected, to a close examination using the peppermint test, and in a written report stated that he could not detect that they were in any way out of order. Though closely looked for he failed to find a probable cause for typhoid fever. Several well known gentlemen, during the prevalence of the disease, have been most frequent visitors to Mr. Kellogg's house, being most auxious that, if a probable cause could be found, it should be removed. They have again and again made investigations without finding

Rebbetile Isome.—As we do not see your valuable paper represented very often in this part of the moral sedgefield, we thought it not amiss to scribble you a few lines "to let you know that we are all well and hope you are the same." The reader will note that the above phrase graces nearly every letter of friendship, so it is not thought out of place to use it here. But it is a fact, and a sad one to the doctors, no doubt that we are all well, since the doctors, no doubt, that we are all well, since the writer does not know of a single case of sickness in Now for the weather, as you know that a newspaper writer should not forget to tell all about the weather, and if he did, why his production should be promptly consigned to the waste-basket. Now, Mr. Editor, did you ever hear of the little boy at school who was asked by the

teacher to spell weather, and spelled it something after this fashion: We-s-i-o-u-t-h-s-j o-u-r. Our weather last Sunday resembled that, in being the vorst spell of weather we have had for some time. O' course it doesn't matter what kind of weather we have during the week, but it is especially important on Sundays, for church reasons, you know. The White Ground Literary Association holds its meetings every Tuesday evening, and are well attended. The discussions are of an interesting character. An entertainment was given some time ago for the benefit of the Association, at which a handome sum was realized. Prof. A. W. Hawks, Mr. John Finch and Mr. Jefferson, all of Baltimore, were present and entertained the large audience in a manner that was highly gratifying and greatly A singing school has also been established at Salem Evangelical Church, and every Thursday evening instruction in do ra mesol is given by Mr. McCla e. We advise all who can to attend, as a knowledge of the art of reading music will more than repay for the time and money spent in its acuirement. We were much interested in last week's issue of the JOURNAL for several reasons. First, we desire to thank your Moukton correspondent for the manner in which he keeps us posted on matters up there. We were very much pained to learn that our esteemed friend Mr. Samuel Bosley has met with an accident. Come, Brother Bosley, what in the world were you doing, anyhow, to get into such a scrape? However, since it is done, it cannot be undone; but just wait awhile and kind Nature will mend your broken bone and set you all right again. Meauwhile you have our sympathies, and we are coming up to see you shortly. Your correspondent also informs us that the Monkton negroes have again become unruly, and that one of them has landed in the House of Correction. We know these darkies of old. We well remember how they used to make Saturday night hideouse. We also remember, two or three years ago, of a great riot taking place in the colored church in which the colored achool teacher was badly used up. The whole lot was arrested and sent to the House of Correction. This had a wholesome effect for a time, but it seems to be about *ausgespielt*. The same soundrel that was sentenced last week was among the last, but he seems to be case-hardened. On last Christmas Day we saw a crowd of negroes acting in a very disor derly manner, and upon expressing surprise that such conduct was tolerated we were informed that they were then on their good behavior, but to come around later when they became warmed up and we

friends are again in trouble on account of the bad condition of the road caused, it is alleged, by the big teams. From private correspondence we learn that meetings are held weekly to take into consideration some measure of relief. Our genial friend Mr. Isaac Peddicord comes in for consider ble notice, as it is claimed that it is his big team that does the most damage. Of course Mr. Pediticord can't haul his big loads on a wheelbarrow; but, friends, be a little considerate with him, for your road is now in the city, and you ought to make the city pave it for you and then you would be all right.

And now, thirdly, just think of it! The Warren
Debating Society has decided that marriage is a
failure! Well, after a little reflection we expect Society is about right. Mark you, we speak believe that there is a pretty general failure t keep the promises made while the parties are standing before the altar. We have heard of some ladies having the word "obey" left out of the ceremony. M _____, and after marriage he dropped the Miss, giving as a reason that she was no longer a Miss; but before ten minutes, in an unguarded moment, he spoke of his wife as "The Old "oman." Ladies, you are contemplating, don't expect to find it a land flowing with milk and honey, but take warning from the Warren Debating Society's verdict and look for a land flowing with dishwater and butter

Secondly, we notice that our Harford Road

milk. We have seen the busy housewife plying her evening cares by carrying a pail of swill to the swine, and have knowledge of the gentle admonition of the Apostle when he said, "My brethren, these things ought not so to be." Then there is another side to be looked at. It was "Josh Billings" who remarked that the sorryest spectacle he knew of was a henpecked husband. Josh was right, no matter whether he learned that from experience or bservation. Nevertheless, this class of citizens are quite numerous, and they will no doubt agree with the Warren Debating Society that marriage is a failure. So, whenever we see a virage ruling the oost and saying to her submissive little husband Come," and he cometh, and 'Do this,' and he doeth it, and sometimes makes it more impressive with the soft end of the bootjack, we can only commiscrate the poor "——" who have wives, especially those who live at Warren; for no doubt it was the presence of such that compelled the Society to come to such a conclusion. Now, Mr. Editor, we are done, and, in conclusion we ask your pardon for intruding upon your valuable space, and promise you that the next time we

will be more careful. JUPITER. Death af a Former Marylander.—Mr. T. M Galbreath, aged 34 years, the well-known druggist on Pacific avenue; Altantic City, N. Loyal Temperance Legion .- The regula monthly meeting of the Towson Loyal Temperance Leglon was held on Sunday afternoon last in the M. E. Church, Mrs. Geo. W. Seipp, Superintendent, presiding. Although the weather was very inclement a large crowd was out, and they were amply repaid for coming, as the exercises were unusually good all through. A New Process in Lime Burning .- On Monday, 28th ult., the Ideal Lime Company of Texas, in the 8th District, started their lime-kiln in operation under the new Process of burning lime stone by the use of gas. The gas is manufactured on the place by the Taylor condenser, by which 60,000 cubic feet of gas is produced from a ton of coal, which it is estimated will turn out 400 bushels of

The kiln was fired at 7 o'clock Monday, 28th uit., The kiln has an outside diameter of ten feet and is sixty feel high, being elevated so that a small car passes beneath it and receives the manufactured lime throughts pair of ingeniously devised sliding doors. The cars receiving the lime will be moved to an elevator connected with the coopershop and packingroom, and are then hoisted to the second floor, where it will be dropped into a large hopper, from which it will pass over on inclined inspection tables into barrels.

The stone is brought to the kim by means of carredrawn by cables, the longest of which is 1,000 feet.

The cables are attached to towers. The capacity of one kiln is about 400 bushels of lime per day.—

Other billing will be built as soon as the trade de-Other kilns will be built as soon as the trade d velops, and it is expected that a capacity of 10,000 bushels daily will be eventually reached. The company owns seventeen acres of land underlaid with limestone.

The gentleman present at the opening operation were—John Keller and Frank Keller, ratiroad con-tractors, of Lancaster, Pa.; H. W. Kapp, superin-tendent of the Northern Central Railway: Colonel M. W. Locke, of Wilmington; H. C. Bartleson, E. B. Knight, C. N. Trump and othes. President Warner received a letter from Governor Jackson, whom he had invited expressing his regret at not being able to be present.

The officers of the company are E. T. Warnel president; Daniel Baker, vice president; E. Duf Slaymaker, managing director. The Charles War-ner Company, of Wilmington, Del., which is now taking the product of thirty kilns located in variplaces in Pennsylvania, are the agents.

It is stated that the trial did not prove that unbounded success that was calculated upon, and the lime burners of Texas are jubinant and are having a regular jubilee over the failure of the new pro-

A Turnip Case.—On Monday, 28th ult., a case involving the ownership of 30 bushels of turnips, variously estimated to be worth from 15 to 80 cents It appears that Andrew Male, a resident of the 12th District, became financially involved, and Mrs. John Beckman acquired the title to his property through an amicable arrangement. A bill of sale was also given by Mr. Male to Mrs. Beckman, excepting therefrom certain crops. On the 30th of Oc-tober Mr. Male contended that Mrs. Beckman gave him permission to move his crops from the premises at a later date, his time expiring on that day. In pursuance of that understanding his two boys, Andrew Male, Jr., and his brother John, went on the place and pulled up a lot of turnips and hauled them away. Mr. and Mrs. Beckman contended

that they did not give Mr. Male the permission to take the turnips away, and had young Andrew Male arrested for larceny. The case was given to the jury without argument, and they returned verdict of not guilty.

Mr. A. S. J. Owens assisted the State in the prosecution of the case, and Mr. John F. Gontrum appeared as counsel for Mr. Male. It is understood that a damage suit by Mr. Andrew Male against Mrs. Beckman for damages has been instituted for a wrongful retention of crops, &c.

THE TIMES is the most extensively circula ted and widely read newspaper published in Pennsylvania. Its discussion of public men and public measures is in the interest of public integrity, honest government and prosperous industry, and it knows no party or personal allegiance in treating public issues. In the broadest and best sense a family and general newspaper.
THE NEWS OF THE WORLD—THE TIMES has all the facilities of advanced journalism for gathering news from all quarters of the Globe, in addition to that of the Associated Press, now covering the whole world in its scope, making it the perfection of a newspaper, with everything carefully edited to occupy the smallest space.

JOURNAL OF SOCIETY—The full and accurate record of social movements and entertainments the doings of influential people and the current topics of drawing-room convertation is a recognized feature in THE TIMES. Throughout the social season events of importance are reported daily and the "Journal of Society" in the Sunday edition is of acknowledged interest and authority.
OUR BOYS AND GIRLS—No other newspaper gives the same careful attention to the needs and tastes of young readers. The page devoted espec-ially to them commands the services of the best writers and is edited with scrupulous care, with the aim of making it entertaining and instructive and

helpful to the sound education as well as to the pure amusement of both big and little boys and girls.

THE TIMES aims to have the largest circulation by deserving it, and claims that it is unsur-passed in all the essentials of a great metropolitan SPECIMEN COPIES of any edition will be sent free to any one sending their address.
